

MY BEST HOPES

Things to consider

A variety of questions can be used, together with tools and resources, to ask the child or young person what they would like to achieve over the next period of review. For example:

What are your hopes about the important people in your life?

What are you hoping to achieve at School?

What are your hopes for your review meeting?

What are you hoping will happen more?

What are you hoping will happen less?

When we meet again in a few months time, if things are getting better what will have happened?

If you had three wishes what would they be?
